PROJECTS

Coffee Shop App, [Live](#) 📄

Sep 2022 - present

- You can add products to the **cart** and also remove them from it. You can also **update** the number of products in the cart.
- Also, every product has its **single page** and its link is generated **dynamically**.
- **API** for this project with ExpressJs. [View API](#) 📄
- **Search page** and basic **search functionality**
- **Sort functionality**
- Frontend using: **React**
- Global state management: **Redux Toolkit**
- Data Fetching: **RTK Query**
- **GitHub link** 📄

Microsoft Todo Clone, [Live](#) 📄

Aug 2022 - present

I'm currently working on this project. But I include some **basics functionalities** of the **Microsoft Todo app** like:

- You can **mark any Todo as important** and that too **got added** to the Important tab
- You can change **multiple background colors** and their values stored in local storage
- Global state management using: **Context API**
- **GitHub link** 📄

Google Weather Mobile App Clone, [Live](#) 📄

Jun 2022 - Jul 2022

I create this app when I was **learning ReactJs**, so their **source code** is not too much better.

- **Tomorrow day** weather with a full different page
- **Next 7 days** weather like the Google weather app
- **GitHub Link** 📄
